

*Preventive works can mitigate the impact of any given hazard and protect the sanitation infrastructure*

Source: Macías, Ramón / February, 2000

*One of the items on any disaster prevention plan must be the safe storage of the chemical compounds used in water treatment*

Source: OPS / OMS, 1999

*Rehabilitation and reconstruction is the time to apply measures to reduce vulnerability, such as changes in the materials used or the correct choice of layout*
