

**CRONOLOGIA DE LOS ACCIDENTES AEREOS REGISTRADOS HASTA 1983**  
**INVESTIGACION PRELIMINAR INFORMATIVA**

Un Accidente Aéreo, (según la Organización de Aviación Civil Internacional OACI), es un suceso, relacionado con la utilización de una Aeronave, que ocurre dentro del período comprendido entre el momento en que una persona entra a bordo de la Aeronave, con intención de realizar un vuelo, y el momento en que todas las personas han desembarcado, durante el cual:

a)Cualquier persona sufre lesiones mortales o graves a consecuencia de hallarse en la aeronave, sobre la misma, o por contacto directo con ella o con cualquier cosa sujeta a ella; o.

b)La Aeronave sufre daños o roturas estructurales que afectan adversamente su resistencia estructural, su performance o sus características de vuelo, y que normalmente exigen una reparación importante o el recambio de componentes; o.

c)La Aeronave desaparece o es totalmente inaccesible.

Para entender esta secuencia debemos explicar una serie de detalles importantes. Hay una serie de casos en los cuales nos faltan datos, es por ello que esperamos contar con su apoyo para poder corregirlos. Otro hecho importante es la clasificación de los Estados, decidimos utilizar las tres primeras letras de los nombres de los Estados, ejemplo: Bolívar = BOL, salvo en las excepciones siguientes:

DPF -Dependencias Federales (Las Islas).

NES -Estado Nueva Esparta.

TFA -Territorio Federal Amazonas.

TFD -Territorio Federal Delta Macuro.

D.F.-Distrito Federal.

VUE -En Vuelo.

La leyenda de las observaciones es la siguiente:

- + - Naves Desaparecidas.
- +++ Colisión entre Aeronaves.
- +++ Año no Investigado en Hemeroteca.
- +++ Aeronaves de otros Países.
- +++ Accidente en otro País.
- +++ Dudas sobre fecha, matrícula, estado, etc...
- A-1 Accidentes Aéreos descubiertos después del 10 de Septiembre de 1986 en la Hemeroteca Nacional. Hay cinco (5) periodos: los cuales tienen su secuencia alfabética (A,B,C,D,E,) estos son: A= 1968 a 1969, B= 1970 a 1975, C= 1976 a 1979, D= 1980 a 1983, E= Accidentes sin información de fecha.
- (=) Varios.

Existe una secuencia numérica y otra alfanumérica, pero esto no afecta el total general de accidentes.

Es importante recalcar lo siguiente, como no hemos obtenido suficiente información sobre los accidentes de los Paracaidistas, no hemos querido numerarlos en esta lista, debido a que desde 1983, solo contamos con el registro de cinco (5) accidentes de este tipo. Sin embargo, los accidentes de Itaros y Globos le hemos dado numeración ya que consideramos que tenemos buena información.

En este resumen, se incluyen también los accidentes de aeronaves en tierra, que no se relacionan con el concepto de accidente aéreo anteriormente expresado, sin embargo, en un trabajo posterior, se separaran adecuadamente.

A Continuación la Cronología.

## LA HISTORIA ESCRITA NO SE OLVIDA

Enrique A. Martín C.

## *El raid del domingo*
