

SUPPLIES LISTED BY FUNCTIONAL AREAS

The supplies and equipment are listed by functional area and in alphabetical order under the following sections:

- Section 1 Drugs and Pharmaceutical Preparations
 - 1A Dispensing equipment and supplies
 - 1B Vaccines and Sera
 - 2 Tablets and Ampoules
 - 3 Dressing and Sutures
 - 4 Rubber Goods
 - 5 General Sundry Items and Fracture Appliances
 - 5B Optometrical Equipment
 - 6 Surgical Instruments and Operation Room Equipment
 - 7 Operating Room Furniture and Sterilizing Equipment
 - 8 Field Medical Equipment
 - 9 X-ray Equipment and Supplies
 - 11 Laboratory Equipment
 - 11B Laboratory Chemicals
 - 13 Packaging Materials and Equipment
 - 14 Charts and Books

All supplies and equipment in the operational Emergency Hospital are packaged in cleated plywood boxes or available as bulk issues. The denomination, box number and quantity issued are listed against each item. In the Training Emergency Hospital all supplies and equipment are packaged in re-useable cleated plywood boxes.

Under box number, the letter "B" indicates that the item is a bulk issue which is packaged in the original vendor's cartons. In Pharmacy Box No. 16 will be found an Alphabetical Listing and Distribution Chart, of supplies within the hospital. There will be a sufficient number of copies to make a distribution to every area and ward in the hospital. This distribution should be made early for the information of Area Chiefs, when setting up the hospital operationally.

Other References

A list of contents of the Emergency Hospital by the above sections indicating the catalogue number, denomination and quantity of each item is available as a separate EHS publication "Emergency Hospital Information Manual", 1965. This manual contains information on the ordering and shipping data, indicating the logistics in relation to each item of supplies and equipment in the Emergency Hospital.
