

This Planning Guide is available at no cost from:

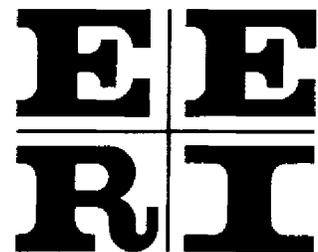

EERI Secretary  
424 - 40th Street  
Oakland, CA 94609

A separate volume which combines the Planning and Field Guides is also available at \$5.00, which covers costs of handling and mailing.

**1977  
PLANNING GUIDE**

Earthquake Engineering Research Institute  
with support from  
The National Science Foundation

# TABLE OF CONTENTS

	Page
INTRODUCTION TO THE EARTHQUAKE ENGINEERING RESEARCH INSTITUTE .....	1
I. PLANNING GUIDE .....	1
Joint Effort Needed on Earthquake Investigations .....	1
Seismic Risk to Cities .....	2
Earthquakes .....	2
Hazards and Risks to the Population .....	11
Seismicity of the United States .....	13
Earthquake Investigations .....	15
Philosophy .....	15
The Concerned Professions .....	24
Planning .....	26
Appendix I-A: Staff and Advisors for “Learning from Earthquakes” .....	27
Appendix I-B: Summary of EERI Earthquake Response Procedures . . .	30
Appendix I-C: References to Reports on Earthquake Investigations . . .	38
II. PREFACE TO THE FIELD GUIDES .....	42
Users of the Field Guides .....	42
Reconnaissance Teams, Coordination, and Communication .....	42
Coordination Meeting .....	43
Identification and Passes .....	43
Building Safety Inspections .....	43
Clothing and Equipment .....	43
III. ENGINEERING FIELD GUIDE .....	45
Introduction .....	45
Buildings .....	46
Introduction .....	46
Definitions .....	51
Structural Concepts .....	51
Lateral-Force-Resisting Systems .....	51
Irregular Systems .....	51
Overturning .....	52
Structural Components .....	52
Moment-Resisting Space Frames—General .....	52
Moment-Resisting Space Frames—Reinforced Concrete .....	53
Moment-Resisting Space Frames—Structural Steel .....	53
Other Frames .....	54
Shear Walls .....	54
Braced Frames .....	55
Precast and/or Prestressed Concrete .....	56
Diaphragms .....	56
Foundations .....	57
Nonstructural Components .....	57
Architectural Treatment and Elements .....	57
Elevators and Exitways .....	59

Mechanical, Electrical, and Plumbing .....	59
Miscellaneous .....	60
Quality of Construction and Materials .....	60
Repaired and Strengthened Structures .....	61
Consequential Damage .....	61
Contents .....	63
Dwellings .....	63
Soil-Structure Interaction .....	64
Lifelines .....	64
Introduction .....	64
Transportation Systems .....	65
Highways—Including Bridges, Overpasses, Roadbeds, and Tunnels .....	65
Railroads—Including Bridges, Roadbeds, and Tunnels .....	66
Harbors .....	67
Airports .....	67
Mass Transit .....	67
Communication Systems .....	68
General .....	68
Telephone and Telegraph .....	68
Radio and Television .....	68
Newspapers and Magazines .....	69
Electrical Power Systems .....	69
General .....	69
Fossil-Fueled and Hydroelectric Generating Plants .....	70
Geothermal, Gas Turbine, and Nuclear Powerplants .....	71
Transmission Lines .....	71
Switchyards and Substations .....	71
Distribution Systems .....	72
Liquid and Gas Conveyances and Associated Facilities .....	72
Pipelines and Conduits .....	72
Canals and Flumes .....	72
Tunnels .....	73
Tanks .....	73
Pressure-Boosting and Pressure-Reducing Stations, Wells, and Pressure Pumps .....	73
Potable Water and Wastewater Treatment Facilities .....	74
Dams and Reservoirs .....	74
Soils .....	75
General .....	75
Ground Cracking and Surface Fault Rupture .....	76
Liquefaction .....	76
Landslides .....	77
Distribution of Shaking Damage .....	77
Fills and Walls .....	78
Statistical Data .....	78
General .....	78
Damage Probability for Engineered Buildings .....	79
General .....	79
Categories of Damage .....	80
Types of Buildings .....	80
Intensity of Ground Shaking .....	81

Instrumented Buildings . . . . .	81
Appendix III-A: Statistical Sampling and Analysis in Earthquake Investigations . . . . .	82
Appendix III-B: Reconnaissance Inspection Forms— Buildings and Lifelines . . . . .	99
Appendix III-C: Emergency Building Inspection Form . . . . .	100
IV. GEOSCIENCE FIELD GUIDE . . . . .	101
Preface . . . . .	101
Introduction . . . . .	101
Deficiencies in Pre-Earthquake Information . . . . .	102
Deficiencies in Post-Earthquake Field Investigations . . . . .	102
Contributions of Seismology . . . . .	103
Contributions of Geology . . . . .	103
Contributions of Submarine Technology . . . . .	104
Contributions of Geodesy . . . . .	105
Design Earthquake . . . . .	105
Potential Geologic Phenomena . . . . .	106
Earthquake Source . . . . .	107
Permanent Ground Deformations . . . . .	110
Acceleration . . . . .	112
Duration of Motion . . . . .	113
Topographic, Focusing, and Resonance Effects . . . . .	113
Planning: The Duties of Geoscientists . . . . .	115
Pre-Earthquake Duties . . . . .	115
Duties of the Seismologist . . . . .	115
Duties of the Geologist . . . . .	116
Duties of the Geodesist . . . . .	116
Post-Earthquake Duties . . . . .	119
Duties of the Seismologist . . . . .	119
Duties of the Geologist . . . . .	122
Duties of the Geodesist . . . . .	124
Data Collection . . . . .	124
Checklist . . . . .	125
References . . . . .	131
Appendix IV-A: Manpower and Equipment List . . . . .	139
Appendix IV-B: Geologic Map and Cross-Section Symbols . . . . .	140
Appendix IV-C: Landslide Classification . . . . .	148
Appendix IV-D: Seismic Water-Wave Intensity Scale . . . . .	149
Appendix IV-E: Unified Soil Classification . . . . .	150
Appendix IV-F: Geologic Time Scale . . . . .	152
Appendix IV-G: Summary of California Division of Mines and Geology (CDMG) Interim Earthquake Response Plan (Reference Only) . . . . .	153

Appendix IV-H: Glossary .....	154
Appendix IV-I: Methodology for Submarine Observation of Faults and Related Earthquake Phenomena .....	169
<b>V. SOCIAL SCIENCE FIELD GUIDE .....</b>	<b>173</b>
Introduction .....	173
Purpose .....	173
Users of the Guide, I: Reconnaissance Team .....	173
Users of the Guide, II: Research Team .....	174
Research Priorities .....	174
Methods .....	177
Organization of the Field Guide .....	177
The Reconnaissance Team .....	177
Purposes and Tasks .....	177
For a Predominantly Urban Earthquake .....	178
For a Predominantly Rural Town/Small City Earthquake .....	180
A Corollary: The Collection of Damage Statistics .....	181
The Research Team .....	185
Research Priority 1: Casualties .....	185
Data Sources and Problems .....	186
Research Priority 2: Emergency Organizations .....	190
Research Priority 3: Search and Rescue .....	195
Other Research Possibilities .....	198
 Appendix V-A: An Overview of Disaster Literature .....	 199

**Foldout Forms:**

Reconnaissance Inspection Forms—Buildings and Lifelines

Emergency Building Inspection Form

Primary Features of Tectonic Earthquakes

Secondary Effects

Recommendations for Further Work
