

Learning objectives

- Recognize the effects that the operating environment has on a logistics system
- Analyze logistics systems by the “supply chain” concept
- Promote improvement in logistics capabilities as preparedness
- List the elements of a logistics preparedness plan
- See long term effects of short-term logistics operations
- Describe the links between logistics programs and development

What is a relief logistics system?

“The basic task of a logistics system is to deliver the appropriate supplies, in good condition, in the quantities required, and at the places and time they are needed.”

Commodities and means of transport

Disaster	Commodities moved	Equipment or vehicles used

The use of the military
