CONTENTS

| | Page |
|--|-------------|
| Foreword | xiii |
| 1. Conceptual Framework | 1 |
| 1.1 Introduction..... | 1 |
| 1.1.1 General..... | 2 |
| 1.1.2 Nature of the Guidelines..... | 3 |
| 1.1.3 Importance of the Quality of Drinking Water..... | 4 |
| 1.1.4 Health Impact of Pathogenic Agents in the Water..... | 4 |
| 1.1.5 Benefits of the Surveillance and Control of Water Quality..... | 5 |
| 1.2 Background, Present Situation and Trends..... | 6 |
| 1.3 General Concepts, Principles and Objectives | 7 |
| 1.3.1 Sanitary Surveillance of Drinking Water Quality..... | 7 |
| 1.3.2 Control of Drinking Water Quality..... | 8 |
| 1.3.3 Relationship between Sanitary Surveillance and Control of Water Quality..... | 8 |
| 1.4 Legal Framework..... | 10 |
| 1.5 Political and Institutional Framework, and Responsibilities | 12 |
| 1.6 Goals and Priorities..... | 14 |
| 1.7 Regulatory Entities | 15 |
| 1.8 Citizen Participation | 16 |
| 2. Elements of Surveillance and Control | 16 |
| 2.1 Basic Aspects..... | 17 |
| 2.1.1 Physical-Chemical and Microbiological Evaluation | 17 |
| 2.1.2 Sanitary and Operational Inspection..... | 25 |
| 2.1.3 Institutional Evaluation | 26 |
| 2.2 Support Aspects | 26 |
| 2.2.1 Regulations and Standards | 26 |
| 2.2.2 Resources | 28 |
| 2.2.3 Training..... | 32 |
| 2.2.4 Sanitary Education..... | 33 |
| 2.2.5 Surveys | 35 |
| 2.3 Information | 36 |
| 2.3.1 Application of the Surveillance Information..... | 36 |
| 2.3.2 Information Flow | 37 |
| 2.3.3 Data Processing and Reports..... | 39 |
| 2.4 Sanctions..... | 42 |
| 3. Methodologies | 42 |
| 3.1 General | 42 |
| 3.1.1 Surveillance and Control Levels..... | 42 |
| 3.1.2 Scope..... | 44 |
| 3.1.3 Fields of Action | 46 |
| 3.2 Surveillance Plan | 48 |
| 3.2.1 Diagnosis..... | 48 |

| | | |
|-----------|--|-----------|
| 3.2.2 | The Plan | 49 |
| 3.2.3 | Intervention Possibilities..... | 51 |
| 3.2.4 | Investments | 51 |
| 3.3 | Water Quality Control in Urban Environments | 52 |
| 3.3.1 | Planning | 52 |
| 3.3.2 | Execution | 53 |
| 3.3.3 | Data Processing and Reports..... | 53 |
| 3.3.4 | Corrective Measures | 54 |
| 3.3.5 | Preventive Measures | 55 |
| 3.4 | Water Quality Control in Rural Areas | 56 |
| 3.4.1 | Introduction..... | 56 |
| 3.4.2 | Evaluation of Water Supply Services | 56 |
| 3.5 | Surveillance | 58 |
| 3.5.1 | General..... | 58 |
| 3.5.2 | Validation of Data..... | 58 |
| 3.5.3 | Auditing | 59 |
| 3.5.4 | Epidemiological Evaluation..... | 59 |
| 3.5.5 | Management of Information, Risk Investigation and Identification | 60 |
| 3.5.6 | Follow-Up and Development..... | 60 |
| 3.5.7 | Periodic Reports..... | 61 |
| 4. | Bibliography | 62 |

List of Annexes

| | | |
|---------|--|----|
| Annex 1 | Frequencies of Sampling and Sanitary Inspection | 65 |
| Annex 2 | Information Required for Planning a Water Quality Control Program..... | 71 |
| Annex 3 | Workshop Participants and Reviewers | 77 |

List of Tables

| | | |
|---------|---|----|
| Table 1 | Indicators for the Water Supply Service | 22 |
| Table 2 | Recommended Analytical Determinations | 22 |
| Table 3 | Proposed Levels Based on the Institutional Situation of the Country or Region..... | 43 |
| Table 4 | Activities per Level of Intervention for the Surveillance or Control of Drinking Water..... | 44 |
| Table 5 | Principal Requirements per Level of Intervention | 45 |

Annex 1

| | | |
|---------|--|----|
| Table 1 | Frequencies of Sampling – Urban Systems. Physical-Chemical Parameters in the Distribution Network | 67 |
| Table 2 | Frequencies of Sampling – Urban Systems. Bacteriological Parameters in the Consumer Network..... | 67 |
| Table 3 | Frequencies of Sampling – Urban Systems. Physical-Chemical A Parameters in the Outlets of the Treatment Plant, Groundwater Sources and Service Reservoirs..... | 67 |

| | | |
|---------|--|----|
| Table 4 | Frequencies of Sampling – Urban Systems. Physical-Chemical B Parameters in the Outlets of the Treatment Plant, Groundwater Sources and Service Reservoirs..... | 68 |
| Table 5 | Frequencies of Sampling – Urban Systems. Bacteriological Parameters in the Outlets of the Treatment Plant, Groundwater Sources and Service Reservoirs..... | 68 |
| Table 6 | Sampling Frequencies – Rural and Periurban Systems..... | 69 |
| Table 7 | Frequency of Sanitary Inspections of the Treatment Plant and System Components..... | 69 |

Annex 2

| | | |
|---------|--|----|
| Table 1 | Input Information. Components..... | 73 |
| Table 2 | Supply Areas..... | 74 |
| Table 3 | Standards Water Quality (Limits and Exceptions)..... | 74 |
| Table 4 | Sampling Forms – Distribution Network..... | 75 |
| Table 5 | Sampling Forms – Components..... | 75 |
| Table 6 | Sampling Forms – Sources and Treatment Plants..... | 76 |

List of Figures

| | | |
|----------|--|----|
| Figure 1 | Relationship between Control and Surveillance of Drinking Water Quality..... | 11 |
| Figure 2 | Components of a Program of Control and Surveillance of Drinking Water Quality..... | 18 |
| Figure 3 | Example of the Analytical Capacity of the Laboratories of the Surveillance System..... | 32 |
| Figure 4 | Use of Information Obtained from Control and Surveillance of Drinking Water Quality..... | 38 |
| Figure 5 | Information Flow–Supplier..... | 40 |
| Figure 6 | Information Flow Surveillance of the Quality of the Water Supply Services..... | 41 |

APPENDICES

| | | |
|------------------------------------|--|-----------|
| Appendix A | National Program for the Surveillance and Quality Control of Drinking Water. Case Study: “The Country”..... | 81 |
| Introduction | | 87 |
| Chapter I | | 89 |
| 1. Rationale and Diagnosis | | 89 |
| 1.1 | The Country..... | 89 |
| 1.2 | Distribution of Communities..... | 89 |
| 1.3 | Population Growth..... | 89 |
| 1.4 | Situation of the Water Supply and Sanitation Services..... | 91 |
| 2. Health of the Population | | 91 |
| 2.1 | Indicators..... | 91 |
| 2.2 | Health Care Provided by the Public Health System..... | 91 |
| 2.3 | Relative Importance of Communicable Diseases..... | 92 |

| | | |
|--------------------------|---|-----|
| 3. | Preventive Medicine in The Country | 95 |
| 3.1 | Health Programs | 95 |
| 3.2 | Investment..... | 95 |
| 3.3 | Public Health..... | 95 |
| 4. | Prevention of Diseases by Water Supply | 98 |
| 4.1 | Impact of the Water Supply on Disease Reduction | 98 |
| 5. | Surveillance | 100 |
| 5.1 | Surveillance of the Water Supply | 100 |
| 5.2 | Surveillance in The Country | 101 |
| 6. | Legal Framework and Organization | 102 |
| Chapter II | | 103 |
| 7. | National Program for the Surveillance and Quality Control of Drinking Water .. | 103 |
| 7.1 | General..... | 103 |
| 7.2 | Goals of the Surveillance Program | 103 |
| 7.3 | Policies and Strategies | 104 |
| 7.4 | Fields of Action | 104 |
| 7.5 | Scope..... | 105 |
| 7.6 | Hoped-for Results..... | 105 |
| 7.7 | The Program's Basic Lines of Action..... | 108 |
| 7.8 | Surveillance and Control Programs | 112 |
| 7.9 | Operational Programs | 113 |
| 7.10 | Support Programs | 114 |
| 7.11 | Options for Implementing Surveillance Nationwide | 117 |
| Chapter III | | 119 |
| 8. | Investment and Costs of Execution of the Surveillance and Control of Drinking Water and of the Water Supply Services | 119 |
| 8.1 | Criteria for the Determination of Basic Costs..... | 119 |
| 8.2 | Cost of the Program | 127 |
| 8.3 | Recommended Option | 134 |
| 9. | Origin and Application of Funds | 135 |
| 9.1 | Sources of Funds..... | 140 |
| 9.2 | Use of the Funds | 140 |
| 9.3 | Execution of the Surveillance Program | 141 |
| 9.4 | Stages of Execution of the Program..... | 143 |
| List of Tables | | |
| Table 1 | Total Population of the Country per Urban/Rural Area, Inhabitants, and Communities | 89 |
| Table 2 | Population Growth in The Country (in thousands)..... | 90 |
| Table 3 | Projection of Communities in the Country | 90 |

| | | |
|----------|--|-----|
| Table 4 | Total Population and Coverage of Water Supply and Sanitation Services in the Year 2000 | 91 |
| Table 5 | Most Important Communicable Diseases in The Country | 92 |
| Table 6 | Incidence and Relative Importance of the Top Ten Communicable Diseases in Peru (1997-1999) | 93 |
| Table 7 | Communicable Diseases in the Country per State (1999) | 94 |
| Table 8 | Investment in Disease Control on the Part of the Health and Housing Sectors (percentages)..... | 95 |
| Table 9 | Incidence of Communicable Diseases in the Country (1999)..... | 96 |
| Table 10 | Impact of Means of Control on Human Health | 98 |
| Table 11 | Influence of Water on Human Health..... | 98 |
| Table 12 | Estimated Reduction of Diseases by the Supply of Good Quality Water (East Africa) | 99 |
| Table 13 | Estimated Reduction of Communicable Diseases by Environmental Control Programs and Others..... | 100 |
| Table 14 | Analytical Determinations Stipulated in the Quality Standard | 107 |
| Table 15 | Number of Determinations per Type of Locality (samples per year) | 110 |
| Table 16 | Analytical Determinations per Level of Surveillance | 111 |
| Table 17 | Frequency of Bacteriological Sampling per Level (samples per year) | 111 |
| Table 18 | Frequency of Physico-Chemical Sampling per Level..... | 112 |
| Table 19 | Frequency of Sanitary Inspections per Level..... | 112 |
| Table 20 | Present Situation of the Programs for the Control of Water Quality and Options for Future Interventions | 117 |
| Table 21 | Cost per Sample Taken | 119 |
| Table 22 | Number of Sanitary Inspections to be Effected per Day and per Inspector | 120 |
| Table 23 | Cost of Determinations per Type of Laboratory | 120 |
| Table 24 | Determinations and Cost per Physico-Chemical and Bacteriological Analysis .. | 121 |
| Table 25 | Cost of Determinations per Size of Community and per Year | 122 |
| Table 26 | Cost of Analysis per Year and per Type of Locality (in US\$) | 123 |
| Table 27 | Cost of Equipping Laboratories | 125 |
| Table 28 | Cost of Staff..... | 125 |
| Table 29 | Cost of Equipping Laboratories per Level of Intervention | 126 |
| Table 30 | Cost of Vehicles..... | 127 |
| Table 31 | Projection of the Population to be Served with Water Supply Services | 128 |
| Table 32 | Projection of Communities with Water Supply Services..... | 128 |
| Table 33 | Number of Localities, Components per Locality and Total Components. Present Situation (Year 2001). Future Situation (Year 2010)..... | 129 |
| Table 34 | Number of Samples to be Obtained for Water Quality Control Present Situation (Year 2001). Future Situation (Year 2010)..... | 130 |
| Table 35 | Number of Sanitary Inspections. Present Situation (Year 2001) Future Situation (Year 2010) | 131 |
| Table 36 | Percentage of Participation of Institutions in the Drinking Water Quality Control Activities..... | 132 |
| Table 37 | Percentage of Participation of the Surveillance Agency per Line of Action | 132 |
| Table 38 | Total Cost of the Program for the Surveillance and Control of Water Quality (2001 – 2010)..... | 133 |
| Table 39 | Summary of Investment to Implement the Program for the Surveillance and Control of Drinking Water Quality 2001-2010 (in US\$)..... | 133 |

| | | |
|----------|---|-----|
| Table 40 | Summary of Investment to Implement the Program for the Surveillance and Control of Drinking Water Quality 2001-2010 (percentage)..... | 134 |
| Table 41 | Summary of Investment to Implement the Program for the Surveillance and Control of Drinking Water Quality 2001-2010–Urban Areas | 134 |
| Table 42 | Cost of Analyses per Year and per Option (in US\$)..... | 135 |
| Table 43 | Cost of Sanitary Inspections per Year and per Option (in US\$) | 136 |
| Table 44 | Cost of Sampling per Year and per Option..... | 137 |
| Table 45 | Cost of Implementing Quality Control 2001–2010 (in US\$) | 138 |
| Table 46 | Cost of Quality Surveillance 2001–2010 (in US\$)..... | 139 |

Appendix B Drinking Water Quality Control in Urban Areas
Case Study: SEDACUSCO Water Company, City of Cuzco, Peru 145

| | | |
|-----------|---|-----|
| 1. | Background | 151 |
| 2. | Introduction | 151 |
| 3. | Rationale | 152 |
| 4. | Goals and Objectives | 153 |
| | 4.1 Main Goal..... | 153 |
| | 4.2 Specific Objectives..... | 153 |
| 5. | Strategy | 153 |
| 6. | Indicators | 154 |
| | 6.1 Water Quality | 154 |
| | 6.2 Service Quality | 154 |
| | 6.3 State of Repair of the Components of the Supply System..... | 155 |
| 7. | Methods and Procedures | 155 |
| | 7.1 Prior Considerations | 155 |
| | 7.2 Planning and Execution | 158 |
| | 7.3 Quality Assurance of Data..... | 159 |

Annexes

| | | |
|----------------|--|-----|
| Annex 1 | Responsibilities | 161 |
| Annex 2 | Sampling Parameters and Frequencies | 165 |
| | 1. Introduction..... | 167 |
| | 2. Physical, Chemical and Bacteriological Requirements, and Sampling Frequency | 167 |
| | 3. Chlorine Residual | 167 |
| Annex 3 | Components of the Water Supply System | 169 |

| | | |
|----------------|--|-----|
| Annex 4 | Collection and Preservation of Samples | 175 |
| 1. | Introduction..... | 177 |
| 2. | Containers and Volumes | 178 |
| 3. | Selection of Sampling Sites in the Network | 178 |
| 4. | Sample Collection..... | 181 |
| 5. | Preservation | 183 |
| 6. | Identification..... | 184 |
| 7. | Packing and Transportation | 185 |
| 8. | Sampling Methods | 185 |
| | 8.1 Sampling from Faucets | 185 |
| | 8.2 Sampling in Open Wells or Storage Reservoirs..... | 186 |
| Annex 5 | Training Program | 189 |
| Annex 6 | Supply Areas | 193 |
| Annex 7 | Number of Samples | 197 |
| 1. | Scope..... | 199 |
| 2. | Number and Frequency of Samples | 199 |
| 3. | Cost..... | 201 |
| Annex 8 | Data Collection Forms | 203 |
| Annex 9 | Quality Assurance of Data | 207 |
| 1. | Introduction..... | 209 |
| 2. | Number of Evaluations Conducted (1) | 209 |
| 3. | Consistency of the Results (2) | 209 |
| 4. | Number of Direct Supervisions (3)..... | 210 |
| 5. | Number of Verifications Conducted in the Field (4) | 210 |
| 6. | Quality of Field Work (5) | 210 |

List of Tables

Annex 2

| | | |
|---------|---|-----|
| Table 1 | Analytical Determinations and Number of Samples per Year..... | 167 |
| Table 2 | Determination of Chlorine Residual | 167 |

Annex 3

| | | |
|---------|--|-----|

FOREWORD

The guidelines for the surveillance and control of drinking water quality are the outcome of a cooperation agreement between the Pan American Health Organization/World Health Organization (PAHO/WHO) and the United States Environmental Protection Agency (USEPA) as part of our commitment to take action on the Plan for the Improvement of Water Quality in Latin America and the Caribbean.

The institution responsible for the operational development of this activity was the Pan American Center for Sanitary Engineering and Earthquake Sciences (PAHO/CEPIS), and the general coordinator and officer in charge of the project was Felipe Solsona, advisor in water quality. His counterpart in USEPA was Fred Hauchmann.

In producing this document, we followed a process which began with two workshops, where international experts on Drinking Water Quality came together to outline its contents and scope. Annex 1 gives details of the workshops and lists the participating experts.

Based on the guidelines produced at the two workshops, Ricardo Rojas, PAHO/CEPIS consultant and expert in water quality, drafted the document. Once completed, it was distributed to a number of international reviewers for assessment. Their names, countries of residence, and the agencies to which they belong are also listed in Annex 1. The resulting criticisms were duly analyzed and reviewers' suggestions have been incorporated into this final version.

At the same time, three case studies were prepared and developed as didactic complements to the Guidelines. The case studies are presented as appendices.

The first case study, a nationwide study, makes use of the data contributed by several countries in a spirit of cooperation. These data were consolidated to describe a single imaginary nation, referred to as "The Country".

The second case study, of an urban area, describes the supply system of the city of Cuzco (Peru). The city's water supply company supported us in this work.

Finally, for the third study, on water systems in a rural environment, we worked with the rural municipalities of the region of Cuzco, with the support of SANBASUR, a Peruvian agency sponsored by Swiss International Cooperation.

PAHO/WHO and USEPA express their gratitude to all those individuals and institutions whose contributions have made this document possible.
